as a Dominant Carrier for High Capacity Services in the Phoenix, Arizona
MSA, CC Docket No. 98-157

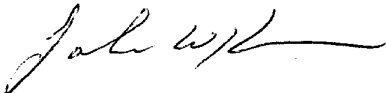

Petition of U S WEST Communications, Inc. for Forbearance from
Regulation as a Dominant Carrier for High Capacity Services in the Seattle,
Washington MSA, CC Docket No. 99-1

Dear Ms. Salas:

The attached material was sent today to Tamara Preiss of the Common Carrier Bureau, in response to her request. Because of the competitively sensitive nature of the information, U S WEST requests, pursuant to Sections 0.457 and 0.459 of the Federal Communications Commission's rules, confidential treatment of this information. If the Commission determines that the confidential treatment cannot be maintained, U S WEST requests the information be returned. Accordingly, the attached copy of the material has been redacted to remove the confidential material. The nonredacted material was sent directly to Tamara Preiss, as noted in the attached letter.

Pursuant to Section 1.1206(a)(1) of the Commission's rules, an original and three copies of this letter and the attachments are being filed with your office for inclusion in the record of this proceeding. In addition, another copy of this letter is provided to be stamped and returned to the messenger who has been instructed to wait for it. Please contact me if there are any questions.

Respectfully submitted,

RE: Petition of U S WEST Communications, Inc. for Forbearance from
Regulation as a Dominant Carrier for High Capacity Services in the
Phoenix, Arizona MSA, CC Docket No. 98-157

Petition of U S WEST Communications, Inc. for Forbearance from
Regulation as a Dominant Carrier for High Capacity Services in the Seattle,
Washington MSA, CC Docket No. 99-1

Dear Ms. Preiss:

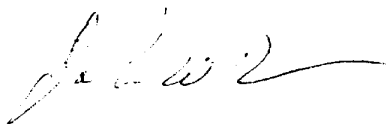

Per your request and to assist the Commission in its consideration of the above-captioned proceedings, U S WEST Communications, Inc. (U S WEST) voluntarily submits the attached information for Phoenix. In addition, the information is also being submitted for Seattle. Because of the competitively sensitive nature of the information, U S WEST requests, pursuant to Sections 0.457 and 0.459 of the Federal Communications Commission's rules, confidential treatment of this information. All pages which contain confidential information have been labeled "Confidential." If for some reason the confidential nature of this material cannot be maintained, U S WEST requests that the material be returned.

The following two attachments are included:

- Attachment 1 lists the wire centers in the Phoenix and Seattle MSAs. An indication is given as to the existence of operational collocation and the current collocators are shown for each wire center.
- Attachment 2 provides the percentages of the U S WEST Communications revenue in the wire centers with collocation in the Phoenix and Seattle MSAs. The revenue is subdivided as noted in the attachment. Caveats on the revenue are also provided.

A redacted version of this material is also being filed with the Secretary's office.

Sincerely,

Attachments

Revenue Percentages in the Phoenix and Seattle MSAs

U S WEST
High Capacity Forbearance

**Percent of Revenues in Wire Centers with Collocation
For the Phoenix and Seattle MSAs**

The percentages of revenues in wire centers with collocation in various service categories are shown for the Phoenix and Seattle MSAs at the end of this page. Descriptions of the categories and the applicable caveats are:

- Interstate carrier and end user billed revenues are included.
- Category 1 includes revenues for entrance facilities, direct trunked and tandem switched transport, trunk ports, interoffice transport for Special Access and multiplexers. Interoffice revenues are assigned to the serving wire center if the customer is a carrier. For end user customers, interoffice is assigned to the 'A' location, the first location shown on the circuit record. Multiplexers are assigned to the wire center where located. Entrance facilities are assigned to the serving wire center.
- Category 2a contains the channel terminations at the carriers' points of presence (POP), Category 2b contains the channel terminations at end user locations. Category 2 contains channel terminations billed to end users. U S WEST does not maintain sufficient information to be able to determine the end which may be at the carrier's POP.
- Per minute of use revenues, such as common line charge and local switching, are not included.
- SLC, PICC and video are not included.
- Non-recurring charges are not included.
- While some carrier billed circuits go from POP to POP and some end user billed circuits go from end user to an end user locations, this analysis uses the conventions described above to assign the revenues to the wire centers and subcategories.
- Interoffice transport and direct trunked transport revenues are not included unless both wire centers are in the MSA. If only one end is in the MSA, the revenue is excluded.

	<u>Category 1</u>	<u>Category 2a</u>	<u>Category 2b</u>	<u>Category 2</u>	<u>Wire Centers With Collocation</u>
Phoenix	93.3%	99.8%	96.0%	99.0%	50.8%
Seattle	99.0%	100.0	99.0%	99.5%	88.5%
